

Proof of Concepts

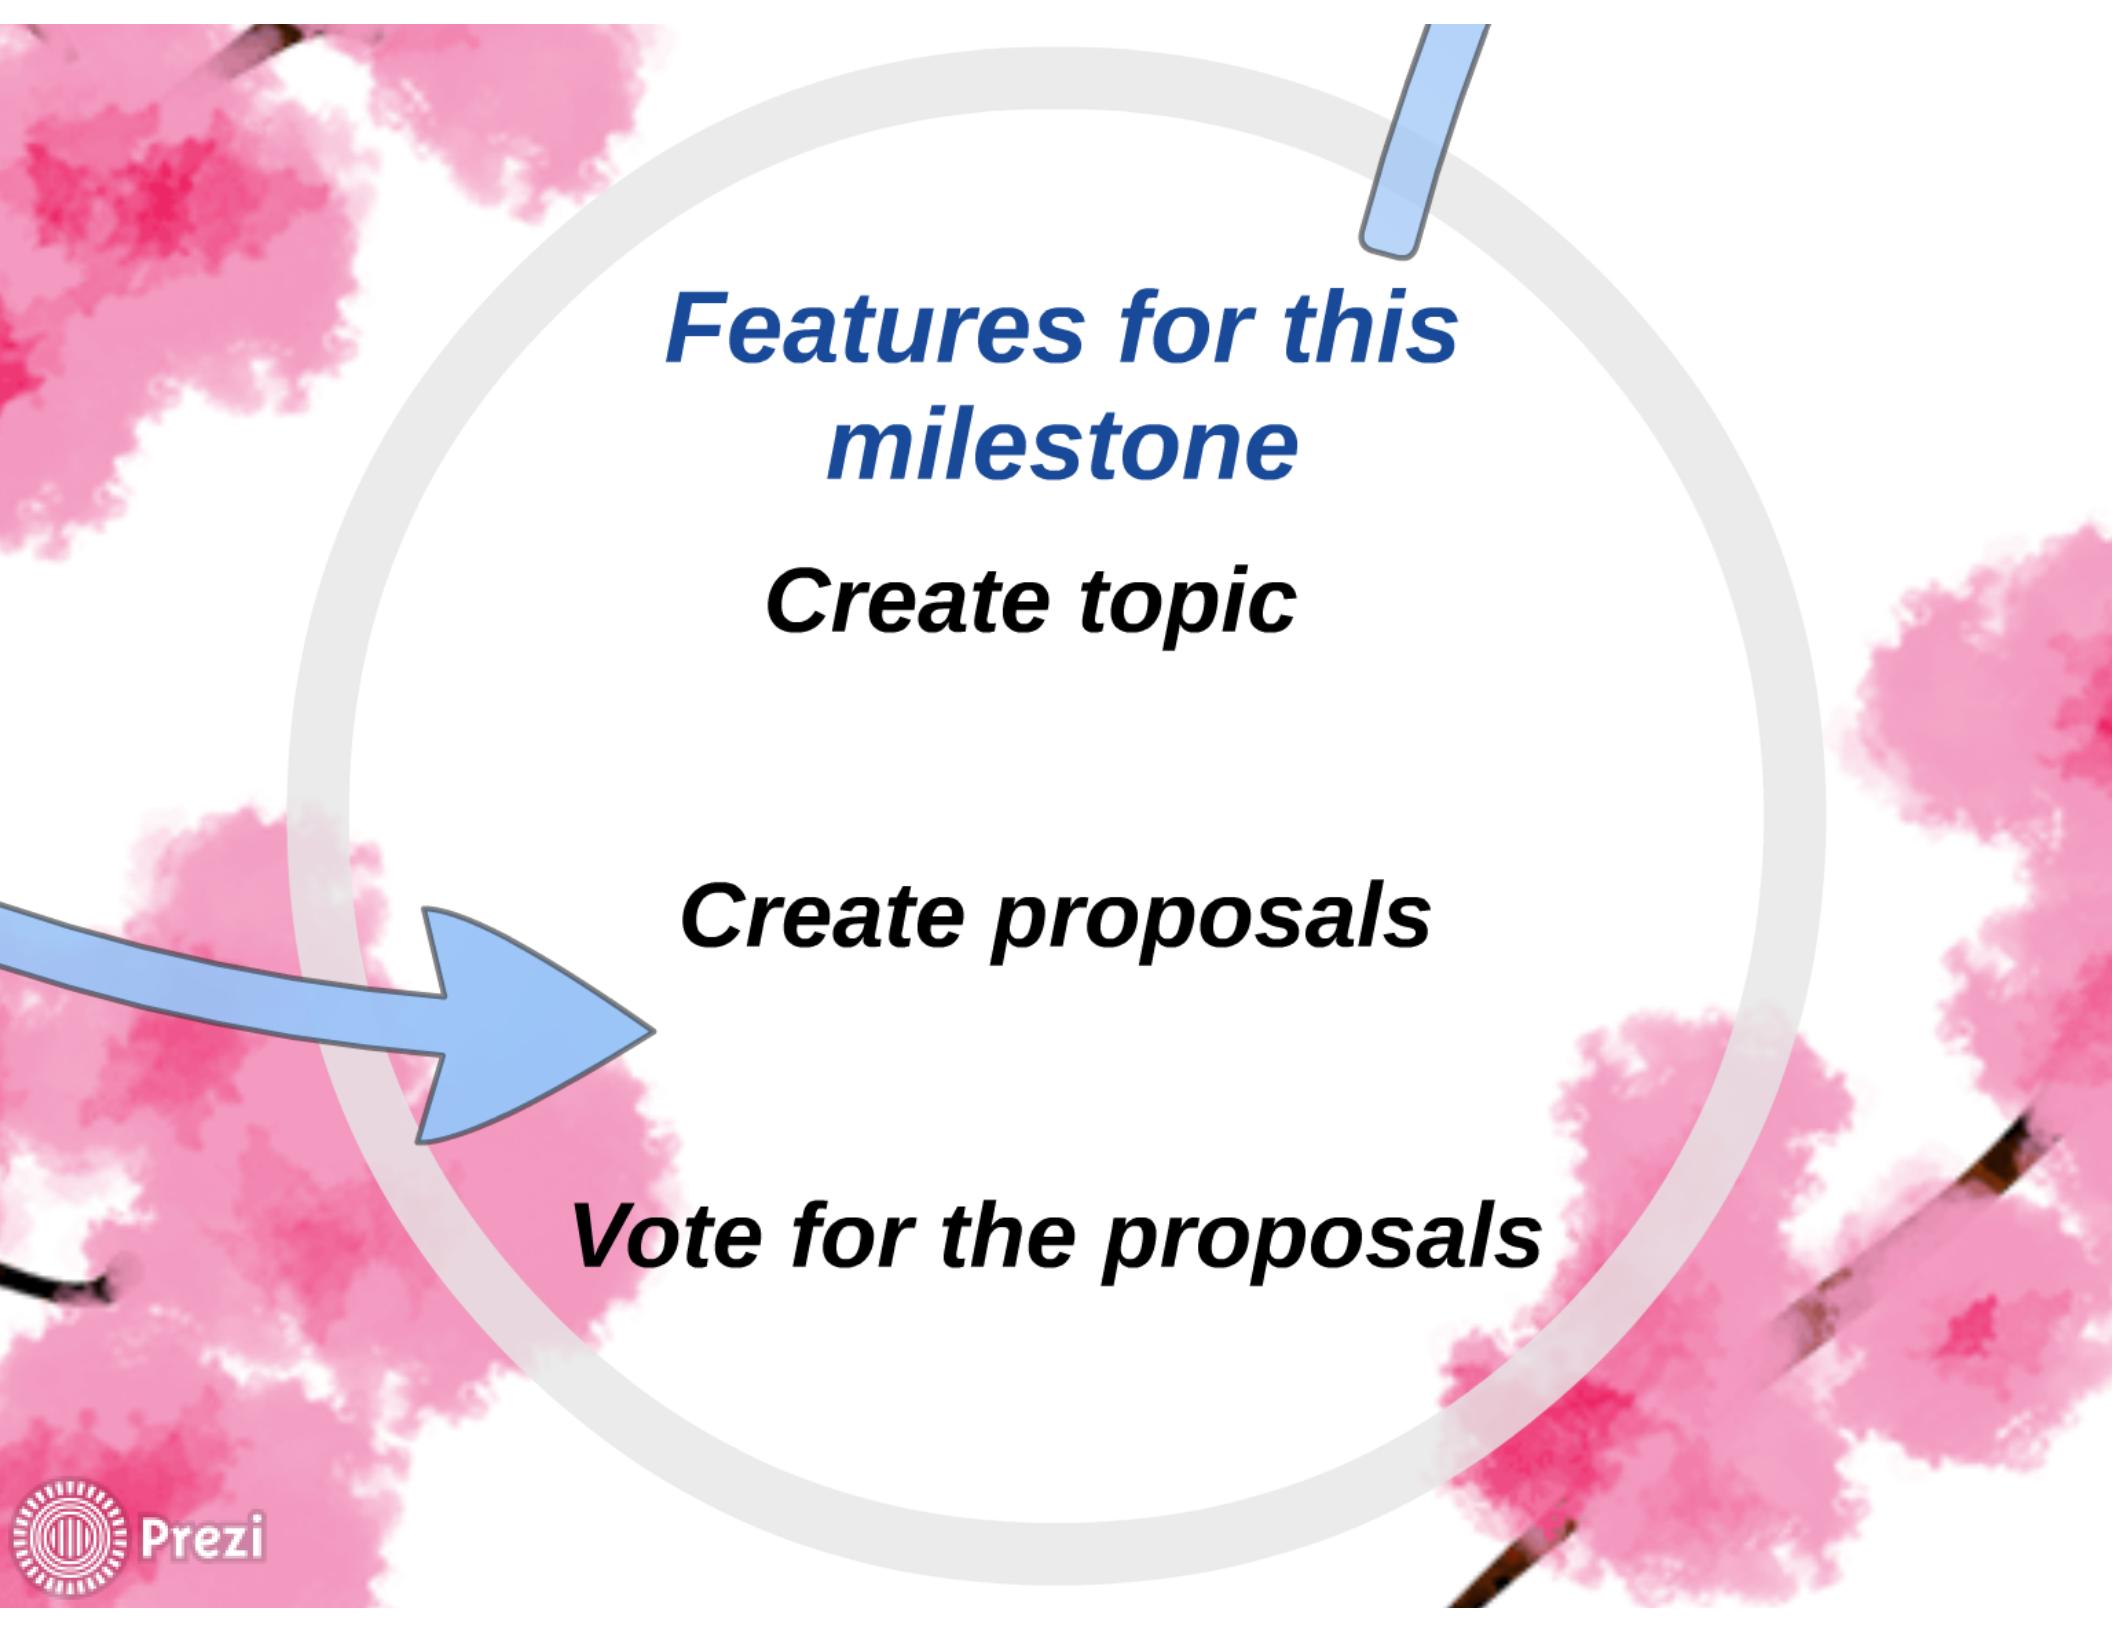

The problem

When we want to organize something with our friends, is always very hard to reach a clear decision. The chat groups can't resolve the problem, so we would need to vote proposals of each one to consider everybody needs.

Typical User

Karin is 22, and she's a student. She loves to hang out with her friends, so for organize she creates a WhatsApp group for asking what the other preferences are, but every time is very stressful, someone put spam and strange photos in the chat, Lena asks for detail about the proposals and Markus connects after few hours and claims a resume about the situation.
It's very difficult to organize without the right tools.

Roadmap

2nd milestone

- Set participation to a topic
- Send feedbacks
- Choose topic attributes
- Set topic deadline

3rd milestone

- Invite external users to vote in a topic
- View topic places with Google maps
- Multilanguage
- Notification system (nice to have)
